Brewerton Brothers Purchase Palace Theatre at Cardston

The Brewerton brothers extended their theatre holdings by a big margin last Saturday when they purchased the Palace Theatre, Cardston, from D. G. Sorentino.

The three brothers, Lee, Gorden and George, now operate theatres at Shelby, Cutbank, Oilmont, Sunburst, Kevin, Raymond and Cardston. They are really pioneers in the moving picture business having been established in Raymond for the past twenty years or so. They were the first to show a two-reel picture in this district, In past years their experience has extended to operating theatres in Vulcan, Red Deer, Olds and Edmonton.

The Palace theatre will be managed by Gorden with Lowell Court as machine man, but films will be purchased through the local theatre, of which Lee will still maintain active management The same pieures will be shown here and at Cardston. The newly aquired buying power will be used as an influence to secure nothing but the latest and best film releases.

Although the new owners took possession of the Palace last Monday, the official opening will not be announced until the present Palace bookings have been run off.

Mr. Sorentino, the former owner, will leave soon for South American, where he will engage in establishing agencies for a new radio corporation, of which H. B. Brown, former head of the Lethbridge Stake, is now president, with his office in Salt Lake City.

Town Council Notes

The following is a brief report of what occured at the meeting of the town council held Thursday, May 12.

C. W. Stone, who was present, stated that his bid on the park land amounted to $143.50 according to the understanding of the acreage when the bid was made. The council held that the exact acreage was not then known and that bids were given by the acre. Therefore they required Mr. Stone to pay for the exact acreage leased which amounted to $169.50.

Ray Knight requested more strict enforcement of the stray pen by-law. Stray pen fees were revised, and hereafter a fee of $1 00 will be charged on animals impounded during the day, and $2.00 on animals impounded during the night.

Both local banks solicited the school account which has been taken over by the town. The account was awarded to the Standard Bank because of the fact that two other public accounts, viz., the Town and rural municipality, are both carried at the Bank of Montreal. It was decided to keep the above accounts at the respective banks permanently.

Dr. S. Astrof requested payment for account against J. Anderson, the Seely child and Bob Daniels. These were granted. The doctor requested an increase in salary as health physician from $200 per year to $450. This was not granted.

Constable Van Orman applied to purchase a building lot next to the Massey Harris building. Granted.

The government analysis of Raymond ice and water was read. It stated that both ice and water free from bacterial life, uncontaminated and satisfactory as far as health regulations were concerned.

News Notes

Complete change of pictures at the Rex Theatre Saturday night. "Casey at the Bat" showing the last time tonight, Friday. Ben Lyon in "The Perfect Sap" Saturday night.

Dean Lamb has started a drayage service. His ad appears in this issue.

News Notes

Mrs. T. L. Halpin and Mrs. F. Ralph will leave next Tuesday for Ontario where they will spend a few weeks visit.

Tuesday next being a public holiday, Victoria Day, all places of business will close.

Tile piping for the new drain along Broadway has arrived and will be laid as soon as weather conditions permit.

Lee Brewerton and D. C. Peterson were Cardston visitors last Monday.

Wm Clemis spent a few days last week at a Lethbridge hospital with an injured knee. During his absence his position here was filled by Elred Hudson of Magrath.

A special novelty dance will be given in the Opera House on May 24. Watch for posters.

On Saturday, May 21 at the United Church a W. I. Girl's club will be organized under the direction of the constituency convener. This will enable the girls to get any line of the extension work offered by the department at Edmonton free of cost. We want the girls of Raymond to be represented at the convention held at Banff on July 5 to compete for the prizes offered and get the benefit of the instuctions by Miss McDermott, who has been brought from New York to give the W. I. Girls special lectures on subjects vital to young women. All girls over twelve years of age are eligible as members and the membership fee is 25c per year.

Mrs. Wm. Wilbur and her daughter Thelma left Tuesday morning for Portland to join Mr. Wilbur, who has spent the winter there.

The long dreamed of and much talked about All-Canadian automobile highway from Alberta to the coast is to be opened this month. Motorist from Alberta going to the coast can travel over the all-red route through the Crow's Nest Pass to Kootney Landing, take the boat to Nelson and then on by way of Osoyoos to Kamloops and over the new B. C. highway to Vancouver.

Emily, the young daughter of of Jas. E. Meeks, who has been seriously ill for the past two weeks died Thursday morning at eleven o'clock.

Blue Sky Laws Badly Needed

With better times now prevailing and business expanding in all directions, work plentiful and wages good, high pressure salesmen to stock up all manner of companies are again much in evidence. Some of the propositions laid before people who have a few dollars to invest are sound enough, others are speculative to a degree, with the probabilities that any money invested will be lost, or, at best, will not be productive of dividends for years to come. The more glowing the prospects held up to the gaze of the prospective investor, the greater the possibility that the investment is a decidedly risky one, in fact not an investment at all.

Unfortunately, it is an extremely difficult matter for anybody but an expert or those who make it their business to keep fully informed to distinguish between the good and the bad or the shark seller's propositions presented to the general public. The only safe course to follow before making investment in any stock is to consult a banker or other reputable financial institution. It is better to be safe than sorry.

It is furthermore unfortunate that the company laws of Canada do not provide adequate protection of the public against these professional promoters of questionable stock and so-called securities. Canada has a right to be proud of its general code of laws but in this one respect the legislation of Parliament has been sadly neglectful of its duty in that it has not provided safeguards against the people of Canada being victimized by persons and corporations offering questionable stock for sale to an unsuspecting public.

Some provincial governments have endeavored to protect their people and, to have their best efforts largely defeated, because of the refusal of the Dominion authorities to supplement those efforts. As a result thousands of Canadians every year are robbed of millions of hard earned savings.

For example, some years ago the Saskatchewan legislature passed an act prohibiting the sale of stocks of any description in the Province unless the Company offering the same first submitted their proposals to the Local Government Board and obtained the approval of that Board and its consent to the stock being offered for public subscription. Certain companies incorporated under Dominion Charters challenged the right of the Province to so restrict their stock selling activities and, upon an appeal to the court, the Saskatchewan law was declared invalid in so far as companies incorporated at Ottawa are concerned. The situation, therefore, is that any company holding a provincial charter and whose stock the Saskatchewan Local Government Board will not permit being offered for sale, has only to obtain Dominion incorporation at Ottawa to defy the Saskatchewan Legislature and sell any kind of stock it likes good or bad.

It will be recalled that much the same situation existed when the Province first adopted prohibitory liquor laws. The Provinces could and did prohibit the retail sale of liquor, but they were powerless to stop its *manufacture within* their boundaries, and equally powerless to prevent it *being brought into the province* from other provinces or foreign countries, because this would be to interfere with trade and commerce which came solely within Federal jurisdiction. Public opinion, however, became so aroused that the Dominion authorities were forced to bow before it, with the result that the law was amended to provide that where a Province adopted prohibition it became unlawful under Dominion law to ship liquor into that Province.

There is need for a similar enactment in relation to Company Incorporation. All that is needed is a very simple amendment by the Parliament of Canada to the effect that, where any Province passes an Act prohibiting the sale of stock in any company unless the same has first been approved by Provincial authority, such law shall be applicable to a Company incorporated under Dominion charter in so far as that province is concerned.

To the average citizen there would appear to be no insurmountable difficulty to the passage of such a simple and reasonable amendment. In fact, the average citizen would imagine that the Dominion Government would be just as anxious as Provincial Governments to protect their people from being victimized by unscrupulous company promoters and stock salesmen. The amazing thing is that, notwithstanding pressure from Provincial Governments, representations from reputable business organizations, strong editorial appeals by financial and other papers, the Ottawa Government declines to do anything, but allows a deputy minister at Ottawa to stubbornly block all efforts made to provide ample safeguards to protect Canadian citizens.

Representations have for some months past been made to the Provincial Government regarding the operations of one of these high pressure stock selling concerns, and protesting against what amounts to legalized robbery, but all the Provincial authorities can do is to admit they are powerless because the Company in question operates under a Dominion charter.

And within recent weeks this very Company has been shown up in reputable financial journals as having secured over $3,000,000 from Canadian citizens, of which conservatively more than $1,000,000 went into the pockets of a subsidiary company as "commission" for selling the stock. In fact, the parent manufacturing company has less than one dollar to show for every two dollars invested by the public. Not only so but the Company has never declared a dividend, and for every dollar's worth of goods it has manufactured and sold it has cost the Company five dollars to make the sale. Yet this Company is still being permitted to sell stock throughout Canada and is doing so to unsuspecting people on the strength of rosy promises of big dividends to come.

It is high time that a certain cabinet minister at Ottawa freed himself from the influence of a reactionary and autocratic deputy head and drafted legislation to be presented to Parliament at its next session upholding and supporting the Provinces in their efforts to put an end to this stock jobbing and legalized robbery, which today is a blot on the fair name of Canada.

Most men would be glad to pay a large income tax for the sake of having that kind of income.

It takes a man with a lot of brass to dispose of a gold brick.

Babies Cry For "Castoria"

Prepared Especially for Infants and Children of All Ages

Mother Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it.

The genuine bears signature of

Chas. H. Fletcher.

Chinese First Paper Makers

Learned Method by Watching Wasp Says Old Legend

According to an old legend the Chinese first learned to make paper by watching the wasp build her nest. A Chinaman, watching the wasp one day, discovered that she took a bite of wood, chewed it into paste, and smeared it on her nest. When the paste became dry it turned into something like the present day paper. Thus the Chinese learned to make paper from wood long before any other people in the world.

Canadian Offices in London

Offices of Immigration and Trade and Commerce May be Combined

Hon. Robert Forke, Canadian minister of Immigration, and Hon. James Malcolm, minister of Trade and Commerce, while in England this summer, will jointly consider the feasibility of combining in one building the branch offices in Britain and on the continent of their respective departments, it is understood. Such a procedure would eliminate duplication of premises and to a certain extent duplication of office staffs.

Mr. Malcolm has already received intimations that the allocation of $100,000 for advertising Canadian goods in Britain will not go very far in making a widespread appeal. It is understood that one suggestion meeting favor is that when big English stores take a large space for general advertisement, Canada should pay a proportion of the cost for whatever amount of space call attention specially to Canadian goods.

Pain In The Muscles, Stiffness In Joints,

Quickly Subdued By Nerviline

Those who have tested out numerous Rubbers will agree that where something is needed to dislodge a deep-seated sore or less chronic condition there is nothing to compare with Nerviline. It's because Nerviline penetrates so deeply, because it has about five times the strength of the ordinary 25c preparation, it has come to be known as King over all Pain. For Rheumatic conditions, muscular and joint stiffness, Nerviline works wonders. Trial proves this. Get a 35 cent bottle from your dealer today.

Canada's Gift to Australia

Maple Trees From Vancouver Island to be Planted at Canberra

Maple trees now growing in the woods of Vancouver Island will form Canada's gift to the Australian people when they open their new national capital at Canberra this month.

Under plans outlined by the Canadian Government, Premier Oliver is arranging for the shipment of a dozen island maples to Australia immediately. The trees will be planted in the grounds of the Canberra Parliament Buildings.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Moraghan, Ont., say: "We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion, break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Breaking New Land

The Dominion Government, through the Land Settlement Board, has arranged for the breaking of 51 quarter sections of land north of Edmonton, the biggest single breaking contract in the history of the province.

Mac—"No I didn't. I said you have."

HAD BAD SPELLS WITH HER HEART

Mrs. R. G. Hall, Bolton Centre, Que., writes: "Some time ago I had bad spells with my heart which I believe was caused by nervousness. I tried everything I could think of, but could get no relief until one of my friends persuaded me to get a box of

MILBURN'S HEART AND NERVE PILLS

After I had taken a few boxes I got wonderful relief.

I now weigh one hundred and thirty-five pounds where, before, I never went over ninety."

Price 50c. a box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

AFTER ALL There's Nothing To Equal Zam-Buk FOR THE SKIN!

Survey of Hudson Strait

Objection Is Taken to the Term "Arctic" in Describing Conditions

President J. A. Stoneman, of the Saskatchewan section, United Farmers of Canada, protests against the Canadian Press despatch of April 28, regarding the air survey of Hudson strait on the ground that it describes the conditions of the strait as Arctic for most of the year.

In reply, J. F. B. Livesay, general manager of the Canadian Press, expresses sorrow if the despatch can be construed in the sense complained of explaining that the use of the term "Arctic" in reference to weather conditions to be encountered in the strait, is used more in descriptive than a geographical sense. But the expression itself, he says, has the sanction of the authorities, for Arctic winter and the Arctic zone are not necessarily confined to the Arctic circle.

In conclusion, Mr. Livesay says: "The object of the expedition is to report more fully than has been done hitherto on the period of navigability of Hudson straits, and all those of us, in eastern and western Canada, who have faith in the Hudson Bay route, will look forward confidently to very encouraging results which, however, will not be attained in the winter months without exposure to pretty rigorous climatic conditions."

Praises this Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

A Puzzle for Scientists

Life Cannot Be Defined Says Professor of London University

That a living organism is not to be differentiated from a non-living substance so readily as is commonly supposed was demonstrated by Professor J. C. Drummond, of the biochemistry department of the London University, in a lecture on "Biochemical Aspects of the Nature of Life." The point he made was that differences in living organisms appeared to be traceable ultimately to differences in the protelus in the constitution of their cells, and that this might give a mechanistic aspect to many biological problems passing into the field of chemistry. Professor Drummond said one could not define "life," because we were but beginning to recognize that only the nearest differentiation could be made between the living and the non-living.

If they attempted to judge which phenomena were characteristic of the living and which were typical of the dead systems, they found that such characteristics as assimilation, respiration, growth, reproduction, irritability and movement were, collectively, typical of the living, and offered a rough and ready method of differentiation, though none of these characteristics might be shown by non-living systems.

Worms cause restlessness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Canadian Tobacco Abroad

Canada Sending Large Shipments to Great Britain

Canada is sending increasing supplies of tobacco to the West of England, according to the Trade Commissioner at Bristol. One organization has built a factory in Ontario, have their own buyers, and are packing the leaf. Canadian Burley, to suit the English trade. Consumers in England are getting used to Canadian tobacco and with the Empire preferential duty, which amounts to 18 cents per pound less than the duty on foreign tobacco, increased quantities of Canadian Burley will find their way to the United Kingdom.

When you hear a married man say that he hasn't made up his mind about a thing he means that he has n't asked his wife about it.

Governor of Rotary

T. A. Torgeson, of Estevan, Is Elected District Governor

T. A. Torgeson, of Estevan, Sask., was declared elected as district governor for the coming year at the close of the first session of the fourth district of Rotary convention at Winnipeg. One thousand persons were in attendance.

Sounding the note of high idealism which characterized the objects of Rotary, past International president D. A. Adams, appealed for the embodiment of those ideals in the life of every Rotarian, in a stirring address.

The governor's report showed Red Deer, Alberta, to have won the George Rorke trophy for attendance during the year, while Prince Albert club won the Osborne trophy for the largest percentage increase in attendance.

MacMillan Going North Again

Will Lead Expedition Into Arctic Latter Part of June

Setting sail from Wiscasset, Maine, next June 28, Commander Donald B. MacMillan, Arctic explorer, will head a new expedition into the far north to spend 15 months exploring and studying uncharted Arctic wastes, the Field Museum of Natural History, sponsoring the expedition, has announced.

A race still living in primitive state and virtually unknown to science except as Naskapi Indians, will be sought out and studied; the lost silk mountains of Baffin Land, a region of creatures or evidences believed to have lived there thousands of years ago, and the remnant of the last great ice sheet which in a past geological age swept down across part of North America, will be explored and studied.

University Women's Prize

Miss Phyllis Gregory, of Vancouver, B.C., was announced recently at the meeting of the Toronto University Women's club, as the winner of the 1927 scholarship of the University Women's clubs of the Dominion. The scholarship will provide Miss Gregory with a course at the University of London, London, England.

Hudson's Straits Air Survey To Undertake Hazardous Work In Northern Waters This Summer

The Hudson's Straits air survey expedition will set out from Halifax on board the Canadian government ship Stanley, early in July, according to information from Ottawa.

For the following fifteen months the Royal Canadian Air Force detachment will be engaged upon one of the most intensive and hazardous flying jobs ever undertaken in the North, it is stated. The flights across the Pole were brilliant feats, but they were in the nature of short dashes, involving some hours of endurance, but the Royal Canadian Air Force work will require fifteen months of day to day flying under all kinds of Arctic weather conditions for the purpose of observing fog and ice conditions.

During the early summer six Fokker seaplanes will be put through severe tests and conditioned for the work in the North. Nearly fifty officers and men under Flight Lieutenant Lawrence will be engaged on the work.

The 'planes, along with a vast amount of material including all food and clothing, fuel and building materials, will be packed on board the Stanley. The expedition will be broken into three detachments upon the arrival at the straits. One depot with twelve officers and men and two 'planes will be established on Nottingham Island, which is in the centre of the western end of the straits. Another depot with a similar establishment will operate from Port Burwell, on the northern tip of Labrador, while the headquarters station will be at Lake Harbor, on Baffin Island, about halfway through the straits.

Powerful wireless equipment will be taken north and it is expected that the expedition will be in almost daily touch with the Air Force headquarters in Ottawa.

The navigation part of the survey will be under the direction of the Department of Marine and Fisheries and it is quite possible that Alex Johnston, deputy minister of the department, may go north on board the Stanley in July. The Stanley, which is now being reconditioned, will not stay in the straits throughout the winter, but will return south late in the summer.

Parliament at the last session approved a vote of $800,000 for the survey, but unofficial estimates put the total cost at nearer a million dollars. It is pointed out, however, that at the conclusion of the work there will be a substantial salvage: the Air Force will have the seaplanes and the Department of Marine will have the reconditioned Stanley, which has been out of use for some time past.

The Air Force report will be made to the Government and upon the results of its findings of ice and fog conditions in the strait depends much of the future possibilities of the Hudson's Bay Railway. At the other end of the Hudson's Bay route there will also be flying activities this summer. A private flying company has been taking in men and equipment from the present end of steel to Port Nelson and Fort Churchill and before the end of the summer Hon. Charles A. Dunning may look over the terminal possibilities himself by seaplane.

The Air Force expedition is quite separate from the annual trip of the Northwest Territories' officials. This voyage will be carried on as usual, taking mounted police and scientists in and out of the Arctic.

A High Birth Rate

Canada Leads All the White Races of the World

Canada's birth rate leads all the white races of the world, being 23.1 to the 1,000. Saskatchewan's rate is even higher, being 24.7 per 1,000. New Brunswick alone surpasses Saskatchewan with a rate of 27.1. Saskatchewan also enjoys the distinction of the lowest death rate among the provinces, and, in fact, in the world, the figure being 6.8 per 1,000 of the population. Next to Saskatchewan is New Zealand with 8.3 per 1,000.

"Why is it that you have broken off your engagement, Alice?" asked her fair friend. "Oh, my dear! He told me he was connected with the movies, and the very next day I saw him driving a furniture van."

The will, recently probated, of a Massachusetts man was written by hand on a strip of paper measuring seven feet, the writing filling all but three inches of the document.

Advice for Airmen

Remarkable Instructions Issued by British Air Ministry to Pilots in Training

"Chew gum and click your ears!" These are two remarkable pieces of advice contained in the latest instruction manual issued by the British Air Ministry to pilots in training. It appears that flying at high altitudes causes a different pressure on the outer and inner eardrums, and constant swallowing is necessary in order to equalize it. Chewing gum helps to keep the muscles of the head active in this way. Pain, temporary deafness, and other ailments caused by the unequal pressure can be cured by "clicking" the ears. This strange feat is performed by pinching the nostrils and breathing outwards.

Registered Seed Grains

Saskatchewan Seed Pool Reports Doing a Big Business

The business of the Saskatchewan Seed Pool is reported more than double that of last year. There has been a particularly big increase in the call for forage crop seeds, while the demand for seed oats shows a bigger increase than the call for seed wheat. Ample offerings in all lines of registered seed grains are on hand at the cleaning plants, taxing the present facilities to the utmost.

Winnipeg Newspaper Union

The Two-piece Frock is More Important Than Ever

This season the two-piece frock rules over a wider domain than ever, and in many days, the hours of its reign extend from morning to evening. Therefore, it must be practical, yet combine as well, a semi-formal charm for leisurely events. The model pictured here is a typical example of a sports costume that is smartly correct for either a morning of shopping, or an afternoon of bridge. The blouse slips on over the head and has a collar that may be worn buttoned high or turned back as illustrated. The front of the blouse has gathers at each shoulder and two patch pockets for adornment, the back being quite plain. The long set-in sleeves are gathered into tailored cuffs fastening with links. The string belt is a new detail and provides a soft blousey effect at the hip-line. Fulness in the skirt is attained by two box-plaits in the front. The Blouse, No. 1347, is in sizes 34, 36, 38, 40, 42 and 44 inches bust. Size 36 requires 2⅝ yards 36-inch figured material; ½ yard plain. The skirt, No. 1341, is joined to a body lining, and is in sizes 34, 36, 38, 40, 42 and 44 inches bust. Size 36 requires 1¾ yards 36-inch material; body lining 1 yard. Price 20 cents each pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Raw Fur Production

Total Market Value of Pelts Taken by Trappers Reaches High Figure

To the value of $1,500,000, the Canadian Fur Auction Sales, Limited, sold a wide variety of pelts in the recent five days' session at Montreal. "One of the best sales weeks we have ever staged," according to F. H. Pingree, general manager. Silver fox skins to the number of 2,600 were auctioned, the top price being $415.

The total value of the raw fur production of Canada for the season 1925-6 was $11,905,588, compared with $15,111,561 for that of 1924-5, and $15,643,817 in 1923-4. These figures represent the total market value of the pelts of fur-bearing animals taken in Canada by trappers or on ranches. In the order of importance, muskrat comes first with 1,953,545 pelts at 3,014,175, followed by beaver with 111,707 pelts valued at $2,208,855. Next came mink, red fox, white fox and silver fox.

Alfalfa Seed For Denmark

Two Carloads of Seed From Alberta Shipped to Denmark Growers

The sale of Grimm's alfalfa seed, grown in the Brooks district, and shipped to Denmark is claimed as another "feather" in Alberta's cap. For some time past, experiments have been carried on in Denmark with this particular seed. So successful have these been, that the Danish growers purchased two carloads. The Danish growers would have taken twice that amount had it been available, but owing to United States growers placing large orders, the local seedmen have not been able to keep up with the demand. Growers of Grimm alfalfa seed have been paid $10 an acre clear for their product.

B.C. Has Advantage in Dairying

Stock Can be Pastured Practically All of the Year

The prediction has been made by Dr. G. C. Creelman, former president of the Ontario Agricultural College, that British Columbia will become the greatest dairying district of Canada. This is the conclusion he has made from a study of conditions on the Pacific Coast. One great advantage is that dairy stock can be pastured practically the whole of the year, whereas in Ontario they had to be fed six months in the year and 60 per cent of the produce of a 100-acre dairy farm with an average amount of stock had to be used for feed.

Will Deliver Official Welcome

Premier W. L. Mackenzie King will deliver the official welcome on the behalf of the Dominion of Canada to the delegates to the World's Poultry Congress on the opening date, July 27.

Sally—"No, I never would be happy if I married you. You know I always want my own way."

Ted—"Well, you can go right on wanting it after we're married."

A man often loses lots of money experimenting with schemes to make money without work.

German Firm Insures Against Bad Weather

Quite in Keeping With Progressive Spirit of Age

For many years we have been used to hearing of odd guarantees undertaken at Lloyd's in the form of insurance against all sorts of risks in almost every conceivable manner and under the most weird conditions. It has remained for the German insurance companies to undertake a general weather policy. The advantages of this ought to be obvious to the most obtuse mind. For instance, suppose you have arranged to take your holidays in the first half of August, and, instead of sunny skies and balmy air, you have lowering clouds and continuous rainfall. What a comfort it would be to notify your insurance company and quietly await the arrival of their cheque "in full settlement of claim on account of inclement weather."

According to this German system, you can take out a policy for any number of days in the whole year, so there is no difficulty about safeguarding yourself. How the matter will work out if racing men begin insuring themselves against turf losses through weather risks it is not so easy to determine, but doubtless methods will be found to protect the insurance companies from any misinterpretation. The principle of insurance against weather reverses seems a sound one, quite in keeping with the progressive spirit of the age.

Growing Desire for Beauty

Ninety-nine Thousand Rose Trees Purchased Last Year

Each successive year sees a considerable contribution made to the general beautification of Canada. Evidence of this is disclosed in a recent report issued by the Canadian Government Bureau of Statistics, which states that ninety-nine thousand rose trees were purchased last year from wholesale growers in the Dominion alone.

Nine hundred thousand other ornamental trees and shrubs were bought from Canadian growers to be planted about the houses. Home-makers bought half a million plants, and many thousands of bulbs, and of the dozen varieties of cut flowers raised by florists, the flower-loving public took fifteen million plants, paying over a million and a quarter dollars for them.

These figures do not include imported plants and flowers, nor those raised by amateur gardeners, a vastly greater showing. The figures are simply those of the wholesale trade, which received over a million and a half dollars from the retailers and direct purchasers.

This was the first year of the inquiry, and there are hundreds of nurserymen who made no returns.

Statistics show that nearly all motor accidents occur at week-ends. Monday was once wash-day. Now it is the day when mother sees whether all her family have survived the week-end.

"That, my boy," said the forger of coins to his son as they passed the Mint, "is our principal competitor."

First Refugee from Chinese War

Mrs. Melvin Southwick, of Harrison, N.Y., returned to New York, April 12th, aboard the world-cruising Canadian Pacific flagship Empress of Scotland, with her infant daughter (then 12 weeks old), who was born in Hankow, China, a few days before, the inhabitants were ordered to evacuate. She went to Shanghai and thence to Kobe, Japan, where she embarked on the Empress of Scotland. Her husband is still in Hankow, acting as representative of the Standard Oil Company there. She was met by her mother, Mrs. Freda Becker, when the Empress docked. Mrs. Southwick looks none the worse for her adventure, but that may be due to the kindness of the passengers on the C.P.R. vessel's world trip, who couldn't do too much for her and for whom her dramatic escape and presence on the ship added a final thrill to the many they had experienced on their globe-circling journey. As for Miss Southwick, she wasn't interested either in the Chinese or her numerous adventures.

Western Inland Fisheries Have Been Developed More Highly Than In Any Part of the World

Alberta Forage Crop Cars

Forage Crop and Poultry Cars Convey Information to Farmers

The forage crop and poultry cars which were operated in Alberta by the Canadian National Railways in conjunction with the Alberta department of agriculture have concluded their itinerary. Twenty places were visited and the movement was confined to districts in which the Western wheat-stem sawfly is now ravaging or in which the fertility of the soil, due to continuous grain growing, is rapidly becoming depleted. Where soil impoverishment is found, the inclusion of forage crops in the farming rotation will add fibre and increase the soil content of available plant food, and as sweet clover and the broad leaved forage crops are immune from attacks of wheat-stem sawfly, the growing of such crops will play an active part in controlling and eliminating this pest.

The total attendance was 1656 or an average of 82.8 persons per meeting. Forage crop seeds amounting to 6,559 lbs., valued at $951.10 were sold, comprised of corn, 126 lbs., grasses, 2,819 lbs., sweet clover, 2,915 lbs., and alfalfa 400 lbs. At each point lectures on the value of forage crops in the farm rotation and their relation to the keeping of live stock were delivered by James Murray of the Alberta department of agriculture. Interest was keen and many questions on cultural methods were asked.

A lecturer on poultry gave talks on the fundamental principles necessary for the successful care and management of the farm flock. Much interest was shown by farmers in this phase of farming, which indicates they are rapidly becoming appreciative of the value of including side lines in their farming activities. Many farmers took the opportunity of commissioning the poultry lecturer to secure supplies of hatching eggs and day old chicks.

"Carat" as Applied to Gold

Refers to Purity or Quality and Not Actual Weight

"Carat" is a corruption of a word that used to stand for a particular sort of dry seed. As these seeds were always exactly the same size, they became a recognized standard of weight for such small articles as jewellery and precious stones. In the weighing of gold, 24 of these carats went to one special coin, now long obsolete.

Today the term carat has nothing to do with the actual weight of gold, but refers to its purity or quality only. By itself gold is too soft for common use, and has therefore generally to be mixed with some other metal, and when we speak of "22-carat" gold we mean that out of 24 parts of it 22 are really gold. As a matter of fact, even this alloy of 2 parts in 24, or one-twelfth, of harder metal is rarely sufficient, and except for wedding rings, 22-carat is seldom used, 18, 15 or even 9 carat being far more common.

De Luxe Airplanes On London-Paris Route

Machines Are Capable of Carrying Twenty Passengers Each

Airplanes with buffets, bars and other luxuries have been put on the London-Paris service by the Imperial Airways. Planes will leave each city at noon daily and the line will be known as the Silver Wing Service. As there are no regulations for licensing airplane restaurants or bars the company will be able to sell food and drink aerially without a license. Each plane will carry a steward.

Three-engined Argosy machines capable of carrying twenty passengers each, will be used in the new service.

The company has decided henceforth to name all planes after cities. For some time planes named the City of New York and the City of Washington have been flying between capitals.

The old-fashioned man who used to put his fourteen-year-old son on the train for a twenty-mile journey and tell the conductor to take care of him now has a grandson of the same age who can drive the distance in twenty-three minutes.

A man without a single idea is less of a bore than a man with only one idea.

It takes more than nine men to make a fashionable tailor.

Nowhere in the world have inland fisheries been developed as they have been in Canada. Apart from Canada's share in the Great Lakes fisheries which are valued commercially at some $3,000,000 annually, there are tremendous bodies of fresh water literally teeming with fish of the highly edible qualities.

In all the three Prairie Provinces, numerous lakes and rivers, covering nearly 31,000 square miles in area, abound in valuable food fishes. Whitefish, the most abundant species, is unexcelled in quality and is in great demand, while pickerel, tullibee, lake trout, pike, goldeyes and sturgeon, with its attendant product caviar, also find a ready market. Other varieties include perch, mullet, catfish and ling. Whitefish weighing over four pounds each, dressed, are known as "jumbos" and bring the best returns. Dealers paid the following prices for the summer catch of 1926, on the basis of dressed fish at the point of shipment,—jumbos, ten to fourteen cents per pound, and whitefish weighing less than four pounds each, from six to ten cents per pound.

Commercial fishing is for the most part carried on in the winter season, when the chilled or frozen fish may be shipped to distant points. This winter catch is marketed in the Canadian interior and adjoining American states. A large demand has been created in Chicago and numerous other middle western cities, while occasional shipments have been made to such distant points as Montreal and New York. Some summer fishing also takes place, the catch being marketed in the nearby towns.

The value of the fisheries from the so-called prairie provinces according to the latest official returns is $2,365,000 annually although if the value of fish caught for domestic and sport angler's use could be estimated and added the total would doubtless be very much higher. The importance of the fish supply to native life in isolated northern districts is indeed beyond monetary value.

Some of the greatest lakes in the continent — Reindeer, Athabaska, Great Slave, Great Bear—and hundreds of other important but smaller bodies of water are still beyond reach of commercial exploitation through lack of transportation facilities.

During the past couple of years, according to information issued by the Natural Resources Intelligence Service of the Department of the Interior, there has been introduced into this inland fishing industry, a new branch of unusual economic importance, namely, the filleting of pike. Heretofore this kind of fish had no market value, but it has been found that fillets of pike, neatly packed in wooden boxes and shipped fresh on ice or freshly frozen, can be readily disposed of now in the markets which handle the whitefish.

Though the pike is a coarse fish and somewhat unattractive in appearance it has a good, wholesome food value, and when the edible portions are separated from the skin, bones and other waste, they can be shipped and sold to advantage. In fact this is the most economical manner of shipping many species of fish and the ready-for-cooking form in which the product is thus displayed in retail shops appeals favorably to the ultimate consumer. Enterprising fish dealers in some eastern section are now advertising their products in this form almost exclusively.

The introduction of this branch of the fishing industry to Western Canadian waters is proving of dual value. It not only enlarges the market range of the fisherman, enabling him to dispose of a product formerly valueless, but it encourages the capture of a destructive fish whose voracious habits make it a source of great havoc among the more highly prized whitefish, pickerel and other species. This filleting of pike is now being successfully prosecuted as far north as Lesser Slave lake where a plant is in operation.

Americans Buy London Clothes

"Many American visitors regard their hotels as clearing depots for old clothes," said an official of a leading hotel. London being regarded as the world centre of masculine fashions, the visitors take opportunity while there to catch up on style. Some patrons have left as many as ten suits behind them.

Italian Arrested For Selling White Bread

Law Imposed by Mussolini Forbids Any But "Economy Loaf"

Signor Guido di Nipoti, an Italian baker, was arrested in Rome for selling white bread. Soon the streets were thronged with people who had been deprived of their usual white bread and were forced to buy the "economy loaf" which is made of a mixture of wheat flour, barley flour and maize flour. The baker was arrested for selling white bread, which is forbidden by a law imposed by Mussolini.

WEAK AND NERVOUS

The Condition of a P. E. I. Lady Who Again Rejoices in Good Health

I was most [illegible] Dr. Williams' Pink Pills for Pale People," says Mrs. [illegible] of Wellington, Prince Edward Island. "Before I began using them I was so weak and nervous that I could not do my housework. I had no appetite, and what I did eat seemed to distress me. I was pale and thin, and had no color in my face. I was always tired, and had no ambition to do anything. I was miserable in every way. I had been under the doctor's care for some time, but got no better. I was advised to try Dr. Williams' Pink Pills for Pale People, and I am glad I did so, for after using a few boxes I felt like a new woman. I had gained in weight, my appetite returned, and I was able to do my housework without any trouble. I shall always recommend Dr. Williams' Pink Pills for Pale People to my friends, as they did me so much good."

Dr. Williams' Pink Pills for Pale People make rich, red blood and strengthen the nerves. That is why they bring new health and vigor to weak, ailing men and women. They are also a splendid medicine for growing girls, giving them the blood they need when they are developing into womanhood. Sold by all medicine dealers or sent by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta Pool Elevators

The Alberta Wheat Pool has purchased No. 2 elevator at Vancouver at Kingston. The Pool will have 100 elevators in Alberta by the end of the year, according to C. M. Hall, manager of the elevator department.

Mr. Brown—"Where's your father?"

Bright Son—"Oh, he's out taking a little ride in the mortgage."

Sure Signs

of kidney troubles are pain in the back, difficult urination, deposits in urine. Gin Pills relieve kidney trouble by gently soothing and healing the inflamed tissues. 50c a box at all druggists.

SUNDAY SCHOOL LESSON

MAY 15

PETER AT PENTECOST

Golden Text: "Repent ye, and be baptized every one of you in the name of Jesus Christ unto the remission of your sins; and ye shall receive the gift of the Holy Spirit." Acts 2:38.

Lesson Acts 2.

Devotional Reading: Philippians 2:5-11.

Explanations and Comments

1. The Coming of the Holy Spirit at Pentecost, Verses 1-4. Before He left His disciples Jesus gave them a great commission. They were to convince others that He is the Son of God, that he lived and taught as only they could fully testify, that he willingly suffered death on the cross for the salvation of the world, and that He had arisen from the dead and ascended into heaven. "Christ and the power of His resurrection" was a great [illegible] world could not expect [illegible] Christ's followers. [illegible] Jerusalem [illegible] Pentecost [illegible] on a vision. The [illegible] had [illegible] were [illegible] the [illegible] Spirit [illegible] Him, God [illegible] incredible to men, and speaking to each [illegible] in his own tongue." John Kelman.

Requisite on the Farm. Every farmer and stock-raiser should keep a supply of Dr. Thomas' Eclectric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse or cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

Contend Aerials On Schools Are Dangerous

Paris Authorities Instruct Directors to Have Them Removed

On the grounds that wireless aerials might during a sudden storm crash down to the ground and injure passers-by the directors of Paris public schools have just been requested to take down the aerials erected over their buildings.

The Paris municipal authorities instruct their decision by arguing that the wireless sets installed in buildings used as public schools are not used by the directors for the purpose of teaching their pupils, but solely for their own personal amusement.

The Paris newspapers remark that [illegible] might be considered just as dangerous as wireless aerials and therefore ought to be abolished forthwith.

Historic House Destroyed

The cottage at Shallow Ford, near Stafford, the home 250 years ago of Izaak Walton, author and fisherman, whose fame has come down over the years as the author of "The Compleat Angler," was destroyed by fire recently.

Closer Co-operation Between Wheat Pools Is Now Assured

Kansas City, Mo. Closer co-operation of world-wide wheat pool organizations is assured, following a three day conference the second international co-operative pool conference which closed here Saturday.

A central world merchandising agency will not be formed, but as the result of resolutions adopted at the closing session Saturday an international bureau which will act as a clearing house for statistical information, matters relating to the development of international co-operation and such other matters as may be of mutual benefit to the world co-operative movement, will be established.

The resolution instructing the international committee to establish an international bureau was adopted following an address by G. W. Robertson, secretary of the Saskatchewan Wheat Pool, who warned the conference against the danger of an immediate formation of an international selling agency. He spoke on the "Possible Basis for International Co-operation," and suggested the establishment of the International Bureau to bring co-operation between the various worldwide co-operative systems.

The resolution includes declaration that "as soon as practicable, the wheat producers in the principal wheat exporting countries of the world should look toward practical international co-ordination of their marketing programs."

"This must be preceded by thorough organization of the producers of wheat in each country on a permanent basis and each organization must control a substantial percentage of the wheat growers in their countries," the resolution further adds.

"When these conditions are met then international co-ordination will give the growers the same control over the world's supply as is already possessed by other commodities and will materially assist in putting agriculture in the degree of place among the other industries of the world."

Heads Grain Board

Leslie H. Boyd Appointed for Another Period of Ten Years

Ottawa.—On the recommendation of the Minister of Trade and Commerce, the Governor-General has appointed for another period of ten years Leslie H. Boyd, K.C., as chairman of the Board of Grain Commissioners, with headquarters at Port William. Mr. Boyd's salary is fixed at $7,000 per year. Before going to Ottawa in 1917, Mr. Boyd was a practising lawyer in Montreal.

Some efforts to have him replaced by a western politician were made some weeks ago, but were not entertained, and the re-appointment was not unexpected.

Goes to Privy Council

Montreal.—Decisions of the three Canadian courts declaring the British Columbia act of 1920 unconstitutional will be appealed to the Imperial privy council by the provincial government in July, it was announced today. Leave to take the case to the higher court in the British Empire was cabled here by the Privy Council this morning.

Wedded to His Post

Premier Ferguson of Ontario Has no Designs on Federal Office

Cobourg, Ont.—"I have no designs on any public position," Premier Howard Ferguson stated in an address here to Peel County Conservatives gathered in compliment to Colonel T. L. Kennedy, member of the Legislature, and Sam Thatcher, member of the Dominion House.

The Premier made the statement, so he said, to lull the suspicions of the "semi-scared young gentlemen of the press," who had read in recent speeches of his the "ulterior purpose" of making overtures to Ottawa.

Later in his address the speaker made another reference to the subject. Following a review of his policy of making "new men from wayward boys," and of making life brighter for the youth born under physical handicaps, the Premier added:

"Things like these are what wed me to the Province of Ontario and its service, instead of seeking wider fields where I would not be as happy and contented."

Will Set Fruit Prices

Selling Method of British Columbia Board Should Benefit Consumer

Winnipeg.—Fruit growers will pay 10 cents per box this year more than in other seasons, declared P. M. Lloyd, former provincial treasurer, and now chairman of the board of control which will operate the selling policy of the British Columbia fruit growers' co-operative, and urge increases to supports Mr. Black said he was not sorry over the rise, and the scientific method of selling under the British Columbia board would benefit the consumer. The growers of the coast were solid behind the new scheme, he said, and he was confident it would be put into effect by next fall. The difficulties caused by costs of distribution would be ironed out by the co-operative method.

Cruiser and Subs for Sale

Formerly Part of Canadian Navy Are Now Obsolete

Halifax, N.S.—Tenders are being called by the Imperial Munitions Board for the purchase of H.M.C. cruiser Aurora and two submarines. Nos. 67 and 69, now connected to depot formerly a part of the Canadian navy. The officers and ratings have been laid up since the dockyard here became a depot, and are now drawn upon for the limited number of properties purchased. Single Gun on Mr. Jos. The Aurora and the two submarines were presented to Canada by the admiralty shortly after the conclusion of the war.

Reopening Rheims Cathedral

Paris.—The Rheims Cathedral is now completely restored and will be reopened on religious services on Ascension Day, May 26, it is announced.

Solemn high mass will be conducted by Cardinal Luçon in the presence of a delegation from the committee which administered the gift from John D. Rockefeller, jr., and the British and Dutch committees who contributed financially toward the reconstruction work.

Cattle Law Not Authorized

British Cattle Men Protest to Government Against Delay

London.—A number of resolutions passed by borough council protesting against the delay in authorizing importation into Britain of pure-bred Canadian cows and heifers, have been received by the Government.

This was the reply to questions in the House of Commons made by Sir Harry Barnston on behalf of the Minister of Agriculture.

Sir Harry further said the minister had not the slightest intention of altering his decision not to permit the importation of pedigreed breeding cattle from Canada.

The questions referred to the opinions of Chief Medical Officers and Chief Veterinary officers to the effect that it was very dangerous to introduce Canadian heifers to Britain because they were much more prone to tuberculosis than British heifers. Another member asked whether the understanding reached at the 1923 Imperial conference was that the only cattle to be imported were for breeding purposes, or pedigree stock and not cows and heifers.

Regain Nationality By Year's Residence

Special Provision for Canadian Born Persons Naturalized in States

Ottawa.—Canadian born persons who have been naturalized in the United States and have returned to Canada may now be readmitted to British nationality after one year's residence in the Dominion.

Former Canadians, however, must furnish convincing evidence of their intention to reside in Canada by the acquisition of property in this country and by the subscription to an affidavit or statement that they propose to stay here.

Effect to the act is made by a special provision in order to Canadian born persons who have become naturalized in the United States.

Under the old provision of the Naturalization Act Canadians who [illegible] could be restored.

Moslem Women Revolt

Fifteen Thousand in Parade Burned Veils in Public Square

Moscow.—Thousands of Moslem women in Russia Turkestan celebrated the May day celebrations at an unprecedented [illegible] by publicly burning their veils in the Moslem quarter of Tashkent.

[illegible] Tashkent Moslem [illegible] of the Soviet [illegible] Moslem women [illegible] Moslem quarter [illegible] Tashkent [illegible] Moslem women [illegible] Soviet [illegible] Moslem women [illegible] Moslem women [illegible] Moslem women

Not Allies

Nothing But Close Friendship Between Britain and United States

Formal addresses have now been made by the British Ambassador to the United States and by the American Ambassador to Great Britain — almost identical in tone—deprecating strongly the suggestion that there should be a British-American alliance.

Both Ambassadors dwelt with emphasis upon the great wisdom and priceless worth of the closest possible friendship between these two nations. Their ideals and their moral standards are at least as similar as their language. To neither can war bring anything but devastating loss, and to both peace is a paramount interest. An intimate and permanent mutual understanding is the best insurance that either can have against danger and the firmest guarantee of world peace that can be given to humanity today.

But an alliance would be regarded by the rest of the nations more as a challenge than as a guarantee of peace. They would be very likely to regard it as an effort to impose an English-speaking hegemony on the human race. Here would be the two most powerful political entities in the world linked together in a formal military and naval alliance, and saying to all and sundry that this tremendous power, actual and potential, was ever ready to be mobilized behind Anglo-American policies.

Inevitably, it would set all other races and peoples by the ears. It would seem to be the latest rendering of the Pan German idea—a megalomaniac dream which had a lot to do with precipitating the late war. Bismarck told his royal master that he should walk softly after 1870, because "Europe would never stand idly cock of the walk business." And he was right. It was the Germanic challenge, cradled in the heart of Europe, which drove France and Russia together and finally brought Britain into the same orbit. Pan Anglo-Saxonism must never make the same mistake.—Montreal Star.

Shoes of First Century

Leather Soles With Low Heel Unearthed in England

Leather soles of shoes belonging to the Roman women of Londinium in the first century A.D., were among *the interesting discoveries at Founders* Court, Lothbury, E.C., recently, where excavations are proceeding on the banks of the River Walbrook near the Bank of England.

Small and point'ed as any modern shoe, these leather fragments, embedded in the mud of the old Walbrook, have survived the ravages of time to show that the Roman girl was as proud of her footwear as is her modern sister.

Three such soles have been found, and none of them is worn in the slightest degree, apparently indicating that the owner had discarded them as out of fashion.

The high heel had not yet made its appearance, for one of the women's soles had a low heel, something like a rubber one, still fastened to the leather.

Old Turtle Found

Was Tagged 37 Years Ago in Marsh Near Hamilton Ontario

The Dundas marsh near Hamilton, Ontario, has yielded another curious catch in the form of a large turtle which bore on its shell a small copper plate, which showed the tortoise had been caught in 1890 by M. Franks, Burlington street, and again released. From what can be learned the turtle was quite small when Mr. Franks caught it 37 years ago. It is now two feet long and sixteen inches across the wide part of its back. It was caught this last time by Bert Duckworth, who lives on the shore of the marsh.

Should Know Better

The singer who attended an audition held by the pantomime producer had a good tone, but dropped all her aspirates.

"Quite a good voice," said the producer, "but really, I should like to hear an aitch or two."

"If you knew anythink about music," was the contemptuous reply, "you'd know there's nothink 'igher than G."

Stout theatrical person (engaging room) "Window's a bit small. Wouldn't be much use to me in an emergency." Landlady — "There ain't going to be any sich emergency. My terms for actors is weekly in advance."

The most intricate step, and the one requiring the most lively music, is known as footing the bills.

Getting Rid of Weeds

The Different Methods Followed for Eradication

The prevalence of weeds is a great drawback to farmers throughout the country. They rob the soil of plant food and of moisture, thus increasing the effects of drought by taking up water from the soil and wasting it by evaporation. Being hardier, and, as a rule more prolific than the useful plants, they crowd them out. They increase the cost of every farm operation and cause depreciation in the market value of crops, and their eradication is costly in labor, time and machinery. It therfore behooves every farmer to get as much knowledge as he can of the nature of the weeds with which he has to contend, the ways in which they are spread, and how to protect himself against them. All this information may be found in a bulletin of the Dominion Department of Agriculture on "Weeds and Weeds Seeds," distributed by the Publications Branch of the Department, Ottawa. The bulletin tells how weeds are introduced on the farms with grass, clover and other commercial seeds and feeding stuffs, and how they are spread from district to district by railways and other means of transportation, by stable manure and threshing machines, and how they are disseminated in many other ways. Of the different methods of eradication when once the weeds are established, summer-fallowing has proved to be the most generally satisfactory, but the amount and nature of the cultivation of a summer-fallow depends on the habits of the particular weeds, the kind of soil, and climatic conditions. Using intertilled crops may be substituted for summer-fallow under favorable conditions, and systematic rotations requiring thorough cultivation are profitable methods of control. Seeding to grass for hay and pasture is often a useful method of getting rid of weeds, especially annuals.

A Bit of Canada in England

Lady Byng Grows Canadian Flowers on Her English Estate

Over 1,500 different Canadian plants and shrubs have been planted at Thorpe Hall, near Clacton-on-Sea, where the ex-Governor-General of Canada, Viscount Byng, resides with Lady Byng. Since their return to Thorpe, Lady Byng has made wonderful changes in the grounds in front of the house. She is an enthusiastic gardener, and a "Daily News" representative found her busy in the grounds.

There is a large lake, where various Canadian water fowl are rapidly making themselves at home. Not far away a noisy waterfall feeds two smaller lakes, and stepping-stones, little islands and natural haunts make up a beautiful picture. Everywhere there are strange and peculiar plants, some taken from the Canadian prairies and dropped into quiet Essex soil; some sent by Canadian friends, and many brought by Lady Byng herself from Canada.

The much-talked-about swamp frogs have not arrived yet. They are coming from Ontario, and a nice swampy piece of ground awaits their arrival.

Walking among the trees one constantly sees nesting boxes conveniently placed.

Declares Story a Myth

London's Lord Mayor Says Whittington's Cat Never Existed

History won't vouch for a cat that has charmed children for centuries, Sir Rowland Blades, lord mayor of London, shocked traditionalists by announcing in a speech. The cat, which is supposed to have brought his predecessor, Sir Richard Whittington, fame and fortune, never existed, Blades declared.

The lord mayor said he had been searching the records and had failed to find any contemporary reference to the cat. The story of Dick Whittington's cat he added, has been traced to an Austrian source, two centuries later and truth must prevail over sentiment.

"How did the Smith wedding come off?" "Fine until the preacher asked the bride if she'd obey her husband." "What happened then?" "She replied, 'Do you think I'm crazy?' and the groom, who was in a sort of daze, replied, 'I do.'"

Jerry—"You have heard of the fight between David and Goliath?"

Mae—"I don't read the sport page, but if it's some more scandal let's hear."

The Jefferson Bible is a work of 46 pages compiled by Thomas Jefferson of passages from the four Gospels cut out and pasted together in a single story.

Canadian Sheep Exports

Breeders Are Reaping Reward of Raising Prize-Winners

Partly as a result of Canadian sheep exhibitors winning more than eighty per cent. of the championships, reserve championship and first prizes for sheep at the International Live Stock Exposition at Chicago in the last few years, breeders of pure bred sheep in Canada are now enjoying an additional measure of reward. Shipments of different breeds of pure bred sheep raised in Canada are being sent to several countries, the largest orders coming from the United States, Jamaica and Russia.

Sheep breeders in other countries have found that the climate in Canada is a helpful factor in producing a hardy strain, consequently increasing the animals' resistance to disease.

The demand for Canadian sheep from different parts of the world began to reach a noticeable point about five years ago. Since then it has been increasing each year so that now there is a good market for all the more popular breeds and the prospects are that the demand is likely to become more active.

Round-up of Wild Horses

Roving Bands of These Animals in British Columbia

Hundreds of wild and vicious stallions which roam the ranges of the Cariboo and Cranbrook districts, herding bands of wild horses, are being destroyed by cowboys under government supervision now. Big roundups of these animals will take place at many points in the interior during the next few weeks and the useless horses, which are a menace to the stock industry, will be shot.

These roving bands not only utilize the range for cattle, but they lure domestic horses away from ranches. Alberta agricultural interests are considering the advisability of importing large numbers of the bodies of the wild horses to be used for fertilizer purposes. It is announced at the lands department at Victoria. Roundups of horses for this purpose in the Okanagan Valley are under consideration now.

Must Keep Accurate Time

Experts were busy performing a most delicate task in connection with England's shift to summer time — setting forward King George's watches and clocks. There are more than 300 royal timepieces at Windsor Castle and their adjustment must be accurate to the second. The most valuable clock in the collection is the one in the turret over the state entrance to the Grand Quadrangle, which has been going for a century and seldom varies ten seconds in a week.

Old lady (to bus conductor)—Do you stop at the Ritz Hotel?

Bus Conductor (tersely)—No, madam, not on my pay.

The easiest road to wealth is to have a rich relative die and leave you a fortune.

Indian Stone Mirror

Interesting Relic of Early Days Is Found in B.C.

While there may not have been beauty parlors in pre-historic days, the Indian braves and belles who inhabited what is now Central British Columbia, had their own methods and appliances for enhancing their charm. The "rouge and cosmetics" used were obtained from natural coloring materials, but a recent discovery shows that hand mirrors also existed in those days. The discovery was made by a Dominion archaeologists' party, in the pre-historic part of the ancient Gitksan village site immediately below Hazelton, of one of the extremely rare stone mirrors known to have been used by the Totem Pole Indians of the Skeena Valley area.

The specimen is a thin slab of black stone, one end of which is narrowed for a handle and the other end has its flat surface highly polished. One of the older Hazelton Indians demonstrated to the archaeologists how this was used. The mirror surface was wet and when this is done the polished surface actually reflects the human face so clearly that individual hairs and the color of the eyes are discernable.

This Indian stated that such mirrors were used by the Indians when they were "making up" their faces for tribal dances and ceremonies in the days before the white man introduced the present looking glass. The specimen secured is being sent to the National Museum at Ottawa for the preservation among the prehistoric Indian relics.

Canning Fruits and Vegetables

Canning Can be Done in the Home by Simple Method

Canning is now recognized to be the most practical and economical method of preserving large quantities of fruits and vegetables for home use during winter months. "A can of fruit, a can of vegetables, a can of greens for a family of six for every day in the year that the garden is not producing" is the slogan advocated for every housewife in a new bulletin on "Preserving Fruits and Vegetables in the Home," distributed by the Publications Branch, Department of Agriculture, Ottawa. The constant use of fresh and canned fruits and vegetables means better health for each member of the family. The canning can be done in the home simply and inexpensively without elaborate equipment. Full instructions are given in the bulletin which contains recipes for the preparation and doing up of all kinds of fruits, vegetables jams and jellies.

An attorney who advertised for a chauffeur, when questioning a negro applicant, said: "How about you, George; are you married?"

"Naw, sir, boss; naw, sir; Ah makes my own livin'."

The man who says the right thing at the right time has perforce another merit; when he has nothing to say he keeps his mouth shut.

Some people are always looking for a new kind of mistake to make.

CANADA LOOKS GOOD TO THEM

Here is a typical group of practical farmers and their families from the United States, who have removed bag and baggage into Western Canada, which, as one of them stated, "looks like the land of real opportunity to us." In addition to being farmers of long standing and thoroughly acquainted with all the methods necessary to ensure the successful operation of a large tract of land in Western Canada, these welcome newcomers have plenty of capital to establish themselves and also a considerable amount of farming equipment. There are three families in the photograph. Two of them have gone to the Lintlaw district, Saskatchewan and the third to the Margo district of Saskatchewan.

Last year, through the efforts of L. B. Boyd, superintendent of Colonization for the Canadian National Railways at St. Paul, Minn., 355 families such as these came to Canada and have established themselves. In every case they brought with them large quantities of agricultural machinery and it is estimated that the head of every family had at least $5,000 in cash available for investment in his enterprise. On the extreme right of the picture is seen O. B. Grinley, a member of Mr. Boyd's staff who accompanied these families to Canada and saw them safely to their destinations.

A Little Tale of Home Nursing

Reformation of Living Habits Effected Through Proper Instruction

In an industrial centre in New Brunswick, a Red Cross nurse who was conducting one of the Home Nursing Classes which Miss Barrington has made so popular a feature of both urban and rural life in that province, observed coming in with one of the regular members, one evening, a girl who had never before attended. She was flashily but untidily dressed, painted, powdered and "gay" in appearance, but the nurse noted that had both an unhealthy and unhappy look, and a manner little short of reckless.

With this girl and others of her kind in her mind the instructor keyed her lesson that night to the connection between health and beauty. She described the really attractive girl as one with clear skin, bright eyes, shining, well groomed hair, and an alert, wholesome mind. She pointed out that these things did not come from accident but from intelligent care of the body and mind. She stressed the need of good, properly cooked food, of drinking plenty of good milk, of avoiding over indulgence in sweets and late hours, of opening bedroom windows, of walking, of cutting out late hours and of consuming many vegetables. In concluding her lecture she appealed to the class to try her plan if the beauty of health was desired and she particularly noticed that the flashy girl was very intent on what was said. However in the press of business she soon forget her.

But about two months later after a class had been completed, she found two girls waiting for her and one of them, a fine rosy cheeked healthy looking young woman said to her, "O, nurse, I see that you do not remember me, but I have come to say 'thank you' to you. I came to one of your classes last fall with Mary C— and you told us all about the connection between health and good looks and contentment. I was in a very reckless temper that night. My grandad with whom I lived had just threatened to cast me out if I did not cut out the late hours, at dances, the rouge and flashy clothes, and I had about decided to leave his house and him when I met Mary and we came along to your class in Home Nursing.

"Well, when I heard you talking as you did, I began to think that grandad was not so far wrong perhaps. I was really fond of him, you know, only I thought he was a back number. But after listening to you, I made up my mind that I would try your plan for a week and see how it worked.

"So I bought more milk and drank a pint a day. I bathed oftener, I opened the windows at night and kept better hours. I ate lots of fresh vegetables and tried to be sensible. At the end of the week I felt good, so I went right on and now just look at me! And I am a lot happier and so is Grandad. I am engaged to a nice plain man, and I think I am a much nicer girl myself than I was. So I felt that I ought just to come and tell you about it."

The nurse, much cheered about her work reported to Miss Barrington, Supervisor of Red Cross Home Nursing Classes in New Brunswick, that she "had made a convert," but Miss Barrington who in the past year has organized 77 classes and has seen 1,200 women and girls enjoy and profit by the instruction given, only smiled for she knows that while there may be few cases of conversion so spectacular as this, there is a gradual reformation of living habits of whole communities being effected through the knowledge which is imparted to the home makers of her province or other parts of Canada in the Home Nursing classes.

Surplus of Women in England

Increase of Five Hundred Thousand Over Pre-War Figure

The World War has left more than 1,700,000 surplus women in England, an increase of 500,000 over the pre-war figure, it was revealed in the final volume of British census returns.

The increase over men was most marked among those women of marriageable age, there being 1,470 unmarried women between the ages of thirty and thirty-five for every 1,000 unmarried men. Much smaller families also resulted from the war, as well as a reduction in the population increase rate. Despite this the population of England has reached 37,750,000 or one person per acre.

Horace: "May I marry your daughter, sir. I can't live without her!"

Peck: "Take her mother, too. I can't live with her!"

Some men are so mean that they even refuse to let their wives have the last word.

Forest Fire Loss Reduced by C.N.R.

Railway's Campaign of Education Results in Large Saving

A persistent campaign against forest fires throughout the Dominion of Canada brought a reduction in fire damage along the lines of the Canadian National Railways during 1926, according to W. H. Kilby, Chief of Forest Protection on the National System. During 1926, total fire damage over the 21,000 miles of the Canadian National Railways in Canada amounted to $13,592 or about 64 cents average loss per mile of track. The acreage burned over is shown as 6,041 acres and 420 fires were attributed to railway causes. This makes the total value of property destroyed by fire along the lines of the Canadian National System during 1926, about equal to that of a medium-sized house in one of the cities," Mr. Kilby stated, "and this reduction in losses has been brought about by constant care and supervision.

"The week of April 24 to April 30 inclusive was set aside as 'Save the Forest Week' in Canada, but in order to reduce fire dangers along our lines we have made every week 'Save the Forest Week' on the Canadian National System.

"Our forest protection program" Mr. Kilby continued, "is of equal importance to us as any other part of railway policy, for the forests not only contribute a large share of our total freight revenue, but a large part of railway expenditures must also go for forest products.

"During 1926, it is estimated, the Canadian National Railways' bill for products of the forest amounted to more than ten and three quarter million dollars, and the cost of ties, poles, timbers and other products necessary for railway construction, bridge building, etc., is constantly increasing as the forest growth diminishes. So far as the forests' contribution to freight revenues are concerned, it is estimated that these furnish about 20 per cent of the total tonnage handled by the railway company. More than 12,750,000 tons of woods and wood products were handled by the Canadian National Railways during 1926, and to handle these in one shipment, in ordinary trains, would require some 6,350 locomotives; nearly 2,500 miles of trackage and 33,000 trainmen.

"With this in mind, it is obvious that saving the forests during every week of the year is vital to the Canadian National System, even if it is considered only from a selfish, financial point of view."

New Citizens of Canada

Italians Head the List of Those Becoming Naturalized

Foreign people to the number of 16,797 became naturalized Canadians in the fiscal year which closed a month ago. This is an increase of 1,394 over the corresponding period of time last year.

The great preponderance of the new citizens come from the West, where patents to homesteads depend upon naturalization. Of all races, however, the Italian in Canada is generally the most anxious to acquire the rights of citizenship and as soon as the five years residence is finished he is usually after his naturalization papers. American homesteaders and the Jewish people also are pretty prompt.

Italians headed the list last year with 2,810 naturalizations. Poles came next with 2,618, United States citizens third with 2,354, Russians fourth with 2,157 and Austrians fifth with 2,139.

Other naturalizations were: Rumanians, 1,199; Belgians, 421; German, 413; Swedes, 336; French, 202; Greeks, 229; Norwegians, 316; Hungarians, 102; Turks, 164; Bulgarians, 101; Japanese, 81.

Saskatchewan Swine Clubs

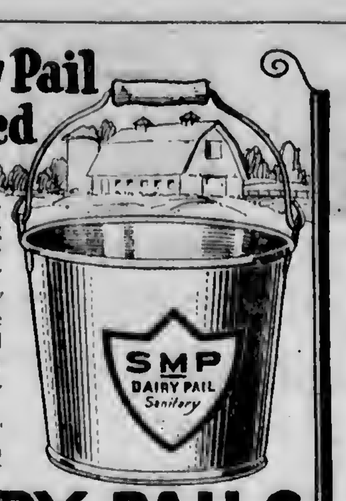
Mr. Brockelbank, swine club organizer in the Saskatchewan College of Agriculture, gives the following list of swine clubs in Saskatchewan, for 1927: Briarlea, Birch Hills, Briercrest, Crosswords, Fairlight, Kisbey, Kennedy, Lac Vert, Marcelin, Manor, Moosomin, Melfort, Parkman, Perdue, Prince Albert, Radville, Roulean, Shellbrook, Togo, Tisdale, Tuxford, Wiseton, Whitewood and Yorkton. In addition, there are new clubs likely to be organized at Bello Plaine, Calder, Foam Lake and Lemberg.

Our idea of a modest man is one who can keep his opinion of himself to himself.

When in doubt a wise man gets out—if possible.

Criticism, like charity, should begin at home.

The Best Dairy Pail Value ever offered



We built this SMP Dairy Pail for the man who is "tired of buying new pails all the time." They are made of good heavy tin, highly polished; strong bottoms; heavy wire handles; and put together the way a pail should be. You'll get full value from every cent you invest in SMP Dairy Pails and other Dairy Tin Ware. Made by

CHAPTER XXXV

The Fete

Puppets and mannequins, puppets in conventional evening black that uniforms eager and blase men alike, and the mannequins of their joyous world in the peacock resplendence that heads the cheese and the imperti; Pierrots and Columbines, eyes shining with the thrill of youth that crosses every threshold with merry speculation, in endless stream they drove from every reach of the Riviera to the gates of Villa Amerie.

Beyond the gates the gardens and terraces, miniature lakes and fairy like structures in delicately pink stucco were bathed in a dull silver flood of artificial moonlight. On the lakes tiny gondolas floated lazily, through waters rippled by dimly illuminated fountains that spurted faint perfumes.

Hidden somewhere in a bower of orange trees an orchestra played its lamentations and its orchestra of summer night passion. Tall palms, feathery topped, black and fantastic, made bowers around benches and tables; great stretches of the lawns had been carpeted with crushed roses purple lilacs, rhododendrons, hyacinths and clematis. Now and then, from the branches of a pepper or fir or pine tree, some tormented bird of semi-tropic plumage, too curious to rest, his head, gazed down upon the scene with great bright inquisitive eyes.

During the day the gates had been closed to all visitors. Only the workmen, caterers, electricians, and the spluttering, queer-mannered men who herded troops of dancers and more nondescript performers, had been allowed to enter the grounds. There had been frantic efforts in many quarters to break through the barrier so firmly guarded by watchmen, but none had been successful. Even the telephone, except that line which reached the offices of the servants, had been shut off. So it was that even the intimates of Villa Amerie, those who had watched the preparations from day to day, were utterly amazed at the splendor, the lavishness, the consummate artistry of the spectacle into which they strolled.

Teddy Dorchester, who had been one of those whose call during the day had been futile, stood amazed when with his sister, Betty Weymouth, at his side, he turned about, on the highest terrace, to look over the sloping lawns. Betty exclaimed:

"Truly, an appropriate whim for a Golden Girl!"

John took her suddenly in his arms. She did not resist but yielded to him limply.

"Daring, brilliant, extravagant!" Lord Teddy murmured. "But just the sort of thing we might expect from her. It's not barbaric, there is nothing haunting. It is a splash of countless money and magnificence but a mellow splash. Somehow I see a note of wistfulness in it all."

Betty Weymouth was silent a moment. Then she said:

"Do you know, Teddy, I think you're right. There's something in this scene tonight, this fete, that isn't mere extravagance; it's bacchanal, I know, but I believe there's sadness in it, somewhere."

"Yes. Like a beautiful woman. There's joy always; but for some one, sadness, too!"

Betty looked at her brother quickly, and understandingly. The sadness he sensed would be for him that the girl whose spring were being given expression tonight was beyond his honest want of her. "Come!" Betty said. "This is no time to be sentimental. There is Roddy Kenilworth, looking none the worse for that thrilling adventure he's rumored to have experienced last night with Joanna. Perhaps he'll tell us something. Nobody seems to know the straight of it!"

Kenilworth, who frankly admitted that he was provoked by Joanna's refusal to hear from him during the day, treated the inquiries by Lord Teddy and Betty whimsically. "Whatever you've heard isn't true," he said. "And what's true isn't interesting. Just a comic opera hold-up, with something fishy about it. The Monaco police notified me today that all valuables taken by the bandits had been mysteriously delivered to them in a package with the terse suggestion that they be returned to their owners."

"But Joanna?" Betty Weymouth asked. "You should never have taken her up La Turbie, Roddy. There are ugly hints about."

Kenilworth ignored the probing. "It is ten o'clock already," he observed, "and neither she nor Yvonne has appeared. Both of them have an admirable sense of the dramatic."

Fantasy in scarlet and gold moved among the guests bearing trays on which cobwebby glasses and silver decanters clinked. Wines of Britanny and the more sensuous fluids of Bordeaux flowed freely. A young debutante from America, one of those whom Joanna used to copy but who, now, planned long and earnestly to hit upon ways of copying her, exclaimed to her companion:

"It's like a scene in a stupendous movie only so different! A movie party is always so coarse and cheap. Here everything is on such a scale of splendor that is romantic! There is so much wine and champagne about, but no one is silly!"

An English countess whirled away on the mimosa lowered dance floor with a partner borrowed for the moment from a celebrated beauty from the chorus of the Follies Bergere. An Indian Prince, scornful of the rules of his caste, wrapped a spell with his sombre black eyes about a gentle girl in satin and pearls. A Deputy of France discussed his wife with a Monte Carlo mascotte in whose saucy head reposed the secrets of many other wives.

Into this enchanted garden the Golden Girl walked at last, with Yvonne beside her. In no bit of her that the eye could discern was there a memory of the night before; of the bitter, disastrous hour in the little room at the club house on La Turbie; of the desperate drive down the mountain, or of the scene at the fire place with Yvonne and John as the actors. The poise of her was regal, arrogant. The crowd that watched the turn of her head, the shimmer of her gold brown hair, the dancing of a thousand phantoms in her deep brown eyes, saw only the pride and consciousness of her golden aura and her self indulgence. It seemed to every one in that crowd that when Joanna had looked upon them, had accepted greetings and expressions of wonder, she gave her brown crowned head a merry toss and then plunged into the seething torrent her golden wand had conjured.

Kenilworth managed to reach her. He caught her hands and hurried into a cascade of questions about the outcome of the night after the bandit took her away, but she laughed at him. "I'll think and talk of nothing yesterday tonight, Roddy," she lantered. "I'm living now just for the hour. Everyone who dislikes me; everyone who scorns me; everyone who loves me is here tonight who knows? You may dance with me once a waltz, I think, Roddy. You may hold me close. I want every one to hold me close, tonight! But you mustn't talk of anything except of me just as I am tonight. Come!"

She led him to the nearest dance space. At every vision to her, wherever she went, orchestras burst into their melodies. She stopped the band that had essayed a fox trot and ordered a waltz and danced it silently with Kenilworth. When the music died she turned to another, waving her hand as she swept away.

(To Be Continued.)

Largest Landowner in Empire

Sir Sidney Kidman, known as Australia's cattle king, will shortly visit England and America on a combined holiday and business tour, during which he will make inquiries regarding the beef trade. Sir Sidney Kidman owns flocks and herds by the hundred thousand in South Australia and is reputed to be the largest landowner in the British Empire. He started on a cattle farm at $2.50 a week.

The man who minds his own business and leaves it entirely up to other people to look after their own affairs really has very little to worry about.

ECZEMA IN SMALL PIMPLES

On Hands and Face, Itched and Burned. Cuticura Heals In Six Weeks.

"Eczema broke out in small pimples on my hands and face. The pimples were hard and red, and itched and burned. I could not put my hands in water because it made them worse. I could not help scratching and rubbing the affected parts and causing disfigurement. The trouble lasted three months.

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. I purchased more and in about six weeks I was completely healed." (Signed) John A. MacDonald, South West Margaree, N. S.

Nothing quicker or safer than Cuticura Soap and Ointment for skin troubles that itch and burn.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

Cuticura Shaving Stick 25c.

CARRIED WIFE TO BED

Suffered So She Could Not Walk. Restored to Health by Lydia E. Pinkham's Vegetable Compound

Minesing, Ontario. "I am a practical nurse and I recommend Lydia E. Pinkham's Vegetable Compound to suffering women. For three months I was almost helpless and could not sit at the table long enough to drink a cup of tea. Many a time my husband carried me to bed, I would be so weak. Then he read in the paper of a woman suffering as I did who got better after taking the Vegetable Compound; so he went and got it for me. When I had taken three bottles I was just like a new woman and have had splendid health ever since. When I feel any bearing-down pains I always take it; sometimes a half bottle or whatever I need. It is my only medicine and I have told many a one about it. Any one wanting to know more about Lydia E. Pinkham's Vegetable Compound, I will gladly write to her. I do all I can to recommend it for I feel I owe my life and strength to it." — Mrs. NEAL BOWSER, R.R. 1, Minesing, Ontario.

Do you feel broken-down, nervous, and weak sometimes? Do you have this horrid feeling of fear which sometimes comes to women when they are not well? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and if taken regularly and persistently will relieve this condition. C

Spring Tints

Gaily colored frocks this Spring! Underthings in soft shades to match. Tint them in ordinary water — but with true dyes. Dipping will do it in ordinary cold water but you must have real dye to get a smooth, perfectly even tone.

Diamond dye powder in fifteen cents at any drugstore; so why do half a job with something not half so effective? And when you want the tint to be permanent, just dip in boiling water instead of cold.

The druggist has color cards and simple directions for doing perfect dyeing of all sorts of material; silk or wool; linen, cotton goods, mixed goods, or any food at all; and exquisite tinting of dainty things. Or, send for a marvelous book of suggestions in full colors. Ask for Cuba Tint. Address DIAMOND DYES, Dept. 831, Windsor, Ontario.

Diamond Dyes

Dip to TINT — Boil to DYE

World's Most Modern Warship

Last One Allowed Great Britain Under Washington Treaty

The 35,000 ton Nelson, the last battleship Great Britain can lay down under the terms of the Washington treaty, has arrived at Southampton from the Tyne shipyards.

It is the absolute last word in battleships, said to be the most modern in the world, and the first British battleship to copy the method of turret gun mount. The turrets each contain three 16inch guns, while astern are six steel turrets. Its 9 inch guns are of the new size and fire shell weighing more than a ton. The guns themselves weigh a little more than 110 tons each and are protected by a special thick armor.

The ship is protected from aircraft by hardened steel, bombproof decks, and under water it is designed to resist the explosion of more than four torpedoes. How many aeroplanes and catapults for discharging them are carried is kept secret. The battleship is 765 feet long, 106 feet broad, and carries a crew of 1,360 officers and men. It cost £7,000,000 ($35,000,000) to build and requires £432,000 ($2,150,000) for annual upkeep.

World's Record Hen

White Leghorn Hen Proving a Money Maker for B.C. University

"Maizie," the White Leghorn hen, that last year established a world's record by laying 351 eggs in 365 days is proving a big money maker for the University of British Columbia Farm. Known as "Hen No. 6," she not only presides over the world's record pen, but with her eggs is bringing into the treasury of the University $2,900.

"We have actually sold $1,625 worth of stock from Hen No 6, and have reservations for $1,275 worth, which will bring the total up to $2,900," says Prof. E. A. Lloyd, head of the Department of Field Husbandry. "Hen No. 6 is a member of the world's record pen, from which we are also selling a considerable number of hatching eggs, particularly from the other four 300 egg members of this pen, at $5 to $10 per egg."

Egg and progeny from this pen have found a market in all parts of Canada, the United States, and as far away as Australia.

The Power of Advertising

Card in Florida paper: "Thursday I lost a gold watch which I valued very highly. Immediately I inserted an ad in your lost and found column, and waited. Yesterday I found the watch in the pocket of another suit. God bless your paper."

The old gentleman was a trifle bewildered at the elaborate wedding. "Are you a groom?" he asked the melancholy looking young man. "No sir," the young man replied. "I was eliminated in the preliminary tryouts."

A Hindu artist is planning a world tour, during which he hopes to pay his expenses by writing on grains of rice. Working four hours, he is able to write four hundred letters on a single grain.

Deserted by their mother, three lion cubs, born in Oakland, California, were adopted and fed by a Spanish setter.

Keep Minard's Liniment in the house.

Advance in Medical Science

Instead of Eating Fasting is Recommended as Cure

Somebody dug up a document out of some eighteenth century papers disclosing some curious practices of the medical fraternity in those days. One of these papers revealed that sick persons were sometimes ordered no eat seven meals a day, as much as they could stuff at a time, with concomitant copious drafts of brandy, sherry and other wines.

No doubt the idea was that the patient should "eat to keep up his strength."

Nowadays the tendency, especially among the chaps who make easy money by writing medical columns to the newspapers, from an easy chair instead of getting around among sick folk, is precisely in the opposite direction.

People are told to take plenty of exercise — pushing themselves away from the table, for instance, before they are satisfied and not only to cut down on diet substantially, but even to indulge in a fast for a few days or a few weeks occasionally.

In fact fasting seems to be recommended as a sort of cure-all.

The complete turn of the wheel reminds me of the story of the man who went to a doctor and complained of stomach trouble. "Take heavy meals," said the medico, "and that should cure your ailment."

A week later the man went back and said the trouble was worse than before.

"Eat very sparingly," replied the physician, "and that should cure your ailment."

"But, doctor," protested the man, "you told me just the reverse last week."

"I do, yes," said the wise man. "But, you see, medical science has made vast strides since then."

Little Helps For This Week

As many as I love, I rebuke and chasten. Rev. iii 19.

Great Master, touch us with Thy skilful hand.
Let not the music that is in us die.
Great Sculptor, hew and polish us, we plead,
Hidden and lost, Thy form within us lie.
Spare not the stroke, do with us as Thou will,
Let there be naught unfinished, incomplete, marred,
Complete Thy purpose, that we may become
Thy perfect image to our God and Lord.

Hezekiah Bonar.

Troubles are often the tools by which God ahioned us for better thing. God Almighty rests a man down when He wants to chisel him and the chiselling is always to make him something finer and better than before. —Henry Ward Beecher.

A gem is not polished without rubbing, nor is a man perfected without trials. Chinese.

Ingredients of Bread

The ingredients of cold country make the darkest bread, of the tropics the whitest. Cornstalk are used as an ingredient in bread in Mexico and Central America, dried fish is used in Iceland, potatoes in Ireland, chestnuts in Italy, and during lean years the bark of trees in Russia.

"I saved a life the other day."
"How was that?"
"An auto was tearing down the road."
"Well?"
"I jumped out of the road."

Nothing pleases a man with a well developed sense of humor so much as setting two chronic bores to boring each other.

Borden's
ST. CHARLES MILK

Canada's Air Mail

Flying Conditions Will be Investigated Before Contracts Are Made

The experimental work in connection with the post office department's air mail program will not likely commence until the early fall.

It has been decided not to call for tenders for any definite air mail routes at the present time but late this summer the Royal Canadian Air Force will undertake some experimental work in the Gulf of St. Lawrence and will carry on into the Winter months. The intention is to secure accurate information respecting flying conditions before any contracts are entered into with private concerns.

Her Kidney Trouble Quickly Disappeared

New Brunswick Lady Tells of Benefits Derived from Dodd's Kidney Pills

Miss S. Moorehouse Advises All Kidney Sufferers to Use Dodd's Kidney Pills.

Zealand Station, N.B. (Special) — "I saw your advertisement for Dodd's Kidney Pills," states Miss S. A. Moorehouse, who lives at this place. "I had suffered with kidney trouble for over a year, so I decided to give your Dodd's Kidney Pills a trial. I have used several boxes now and have found great relief in them. I can highly recommend Dodd's Kidney Pills and would not be without them."

The reason Dodd's Kidney Pills have come to occupy such a prominent place in the home is that so many ordinary everyday ills come from sick kidneys.

Rheumatism, urinary troubles, backaches and heart disease can be traced directly or indirectly to sick kidneys. To be assured of good health the kidneys must be kept in good working order all the time.

Lethbridge Irrigation District

The Lethbridge Northern Irrigation District enters upon the spring with an additional 10000 acres of land, which came under the new legislature and fall. There has been a considerable influx of new settlers, mainly from Europe.

An Oil that is Famous. Though Canada was not the birthplace of Dr. Thomas' Eclectric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is an ample enough to attest its excellence, for in all these countries it is on sale and in demand.

Brands of cigars in Ireland are being named after prominent ecclesiastical dignitaries. Holy Smoke!

Delayed Spring Work Requires Well Directed Finish

Stormy and cold weather has delayed spring work. With the coming of warmer days a great deal of work on the farm must be accomplished in a short time. Knowing this, one should carefully plan his work and then work to that plan.

It is impossible to secure a good stand of any crop without attention being given to the proper preparation of the seed bed. One must be ready to work the soil at the right time, just as soon as it is dry enough to permit it.

Moisture, warmth and air are necessary to germinate and make the seedlings grow. Cultivation saves the moisture, and also insures the proper air content in the soil.

The first cultivation ordinarily should be deeper than those which follow. The tiny plants will permit of closer and deeper tillage. When the roots have spread out in all directions, care must be taken that the cultivator does not disturb and destroy these sources of the plant's life. It should be remembered also that one cultivation while the weeds are small is worth several after they have grown larger. Millions of weed seedlings will soon be coming through and can be easily destroyed by running the well sharpened knives of the cultivators down the furrow.

The cold weather has delayed the germination of wild oats and other weed seeds so late that it was necessary to plant beets before it was possible to properly destroy this foul growth, consequently many of our supposedly clean beet fields are taking on the appearance of a thrifty grain field, the grain however being of the wild variety and most difficult to kill. Where this condition exists the success of the beet crop is dependent almost entirely on the proper and early elimination of these wild oats, etc. The fields where wild oats are prevalent should be cultivated just as soon as it is possible to guide a cultivator down the rows. With one man to drive and one to guide the cultivator it is possible to cultivate beets before they are up. We suggest the use of the disk weeders on the front bar of the cultivator with the knives set in just a little on the rear bar. However use whatever tools you can work best, but do not delay these cultivations. In a weeks time it is possible for wild oats to become so thick and matted that it is next to impossible to to cultivate them out. Early cultivation is your cheapest method of weed elimination.

WHEN BANK OF MONTREAL TOKENS WERE USED FOR SMALL CHANGE

FOUNDED before Canada had any currency of its own, the Bank of Montreal in the early part of the Nineteenth Century obtained authorization from the British Government to issue copper tokens for small change.

Reproduced herewith are the two sides of the one-penny token of 1838 and of a "habitant" token of 1837. The obverse of the former shows a picture of the building used by the Bank of Montreal at that time, the obverse of the latter a typical farmer of Lower Canada, now Quebec. The reverse of both coins is the same, showing the arms of the city of Montreal.

Throughout its long history, the Bank of Montreal has always been active in serving the financial needs of the people of Canada, steadily extending its service as the need and opportunity for it arose.

BANK OF MONTREAL
Established 1817

TOTAL ASSETS IN EXCESS OF $780,000,000

Raymond Branch: C. C. WATSON, Manager

Mrs. Frank Leavitt Edmonton Delegate

Special features of the W. I. program held last Wednesday were musical selections by Mrs. Fleming and Mrs. Watson, and also a dramatic reading by Mrs. Emma Peterson.

The resolutions to come before the provincial convention next week in Edmonton were dicussed by the Raymond local. All were indorsed with the exception of the resolution drafted to amend the Mother's Allowanee Aet.

Mrs. Frank Leavitt was elected as the official delegate to the convention. She will be accompanied by Mrs. J. F. Anderson, provincial executive, Mrs. J. Powelson representing the Taber constituency, and Mrs. A. W. Kirkham and Mrs. C. Nilsson as visiting delegates.

Prize for High School Pupil

In order to encourage high school students to make a thorough review in preparation for the forthcoming final examinations, the high school staff offered a prize to the student securing the highest number of marks in a preliminary exam held this week. The results of this test will be published next week.

NOTICE

IN THE ESTATE OF ANDREW SHAND WATSON during his lifetime of the Post Office of Magrath in the Province of Alberta, farmer, deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named Andrew Shand Watson, who died on the 3rd day of January, 1927, are required to file with the undersigned by the 1st day of August, 1927, a full statement duly verified of their claims and of any securities held by them, and that after that date the administrator will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been filed or which have been brought to his knowledge.

Dated this 16th day of May, A. D. 1927.

Trenholme Dickson
Administrator of the Estate of Andrew Shand Watson, deceased,
Parlimont Buildings,
Edmonton, Alberta.
